

Crack injectors, accessories ...

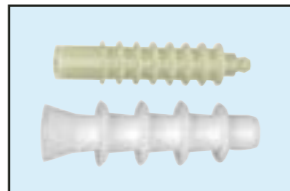

Plastic injectors for wood and walls

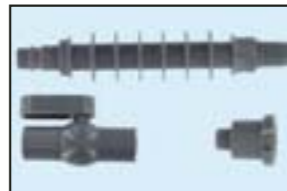

Injector D 6,5 / D 9,5 with / Without nipple for wood

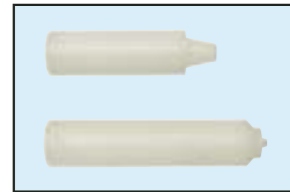

Free flow injectors Bajonett fitting

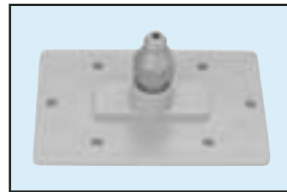

Injectors w. nipple D 12 / 14 / 16 / 18 Integrated ball valve

Modular system for low pressure injection: Ball tap, lamella injector, connecting piece

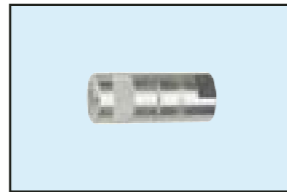

Fixing tool with and Without head piece

Glue injector 40 x 65 With nipple

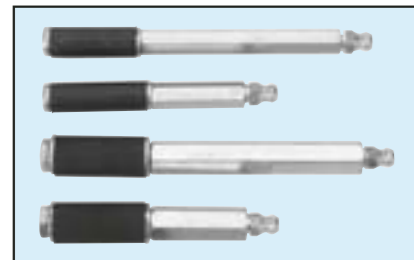

Slide coupling

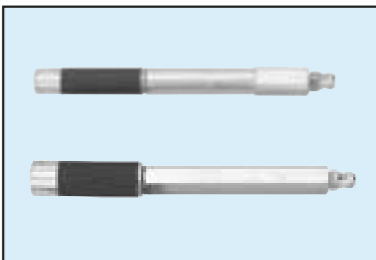

4-jaw-coupling for cone head nipples

Crack injectors steel made or aluminium with head valve

Standard crack injector steel or aluminium available in sizes from D 10/70 to D 20/200

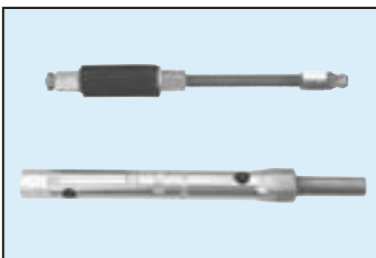

For quick injections without waiting time: Quick site injectors with bottom valves

Alu-Kompact Injector

With integrated bottom valve. Multi usable pressure piece. Diameter 14 mm. Lengths from 85 mm up to 300 mm. With cone head or Flat head nipple.

Quick site injector with nominal break point

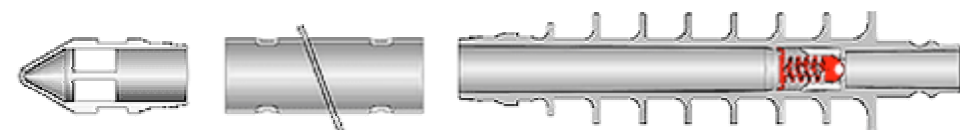

Quick site injector 13/110

With nominal break point. With non return valve. No pre-mounting Non-return-valve and Nipple pre-mounted.

Special lengths up to 500 mm

Fixing tool for accu drills optional available.

Patented gel injector systems available in almost every length required.

For further products please refer to our price list.

Injection sets, hoses, guns, working safety ...

Inject set low pressure With ball tap

Quick lock fitting for Lamella plastic injectors

Bajonett fitting with press. Gauge and ball tap

Filling tubes with ball tap

Inject set flexibel with Press.gauge, 4-jaw-grip

Injection set rigid with Hp injection gun

Hammer drills with SDS Plus / SDS Max fitting

Hand lever guns

Spray set with 5 nozzles, Cleaning balls and tools For spraying bitumen/plasters

Working safety and working tools: Googles, gloves, overalls: Please ask for our price list.

Injection guns Paint spray guns

Paint spray hoses Plaster hoses

Brush set for nozzle cleaning

Order form for b & m injection guide: **How to do professional injections.**

How to do high quality injections? The injection guide will help you. Explanations how to choose the suitable equipment, how to find the right crack injectors, how to do step-by-step injections. Brochure with 20 pages and coloured pictures, easy to understand. Price / each € 8.50 including mail charges.

We order hereby Stk. b & m injection guide à € 8.50

Filling, transporting and injecting of water based, mineral and cementary based products:

Screw Pump BMP 6 Professional allround unit

Also with remote control cable!
Voltage 230 V for every building site

- Cementary grouts
- Suspensions
- Mortars up to 2,5 mm
- Plasters
- Fire protection mortars
- Silicate products
- Filled epoxies
- Micro cement

Screw Pump BMP 5 Filling and injecting at low costs

- Silicates
- Water glass
- Micro cement
- Fungicides
- Micro emulsion
- Lime wash
- Suspensions
- Wood protection
- Pigmented paints

Available with 6 and 30 ltr hopper.
A wide range of accessories enables you to cover almost any application in the field of injecting and spraying pigmented grouts.

Highly recommended for spray application of bituminous and cementary water proofing.
Detachable into 3 parts. Patented.

Application of 2 component Acrylat Gel

Professional technic in stainless steel: BMP 14025 2K 1:1

Pneumatic piston pump with 2 material pumps and separate flush pump in stainless steel. Available with hoppers or suction hoses. The components are transefered separately to the static mixing valve. Due to the new designed mixing valve a separate cleaning of the material valves is possible. Mixing ratio fixed at 1 : 1

How to choose the suitable equipment for your material?
Please refer to our selection chart on page 3!

Transfer and injection of resins and water based products
Coating – Impregnating – Spraying

Electric diaphragm-Airless-units: Mobile as no compressed air is needed.

Airless A 4000 Small, versatile, mobile

Also available with wheel-set

Airless A 5000 Strong but inexpensive

Airless A 10000 suitable for 2 guns

- Field of application:**
- Epoxy resins • PUR-resins (1-/2-K) • Silikate • Injection cremes • Fungicides • Lacquers • Stains
 - Inside dispersion paints • Micro emulsions • Impregnations • Silicates and stone protection
- Only A 10000:** Roof and facade painting, fire protection paints, anti corrosion paints
All models available in stainless steel – especially recommended for alcalic products.

Pneumatic Airless piston pumps Inox:
Suitable for explosion proof areas!

For small quantities, highest pressure:
Drill injection pump „Jumper“

BMP 433 VP

BMP 433-1 VP

BMP 6552

EP-resins, PUR-resins (1-/2-K), silicates, fungicides, pest control, lacquers, varnish, micro emulsion, water based paints
Air motor is driven by compressed air. Compressor needed.
Pneumatic units available up to 416 bar pressure.

Jumper 230 V
Motor is an electric drilling machine
For epoxy and PUR-resins

How to inject like a professional?
Our injection guide will help you. Please refer to order sheet page 6

All units on this page are available with hopper or suction hoses.
With suitable accessories all units are usable for spray application as well.
